

LIQUID AMSTM

Ammonium Sulfate Solution

- A convenient liquid formulation of ammonium sulfate at a concentration of 3.4 lb./gal.
- Ammonium sulfate provides ammonium that can help improve uptake and translocation.
- Ammonium Sulfate also provides sulfate that combines with salts in the spray solution (calcium, magnesium, iron, sodium, etc.) which prevents them from antagonizing glyphosate and other pesticides.
 - Typical use rates for glufosinate is 3.5-7 pt./ac.
 - 1.5-3 lb/ac. of ammonium sulfate
 - Typical use rate for glyphosate is 2.5 gal./100 gal. of spray solution
 - 2.5 gal. provides 8.5 lb./100 gal. of ammonium sulfate
 - Rates can vary between 2.5-5 gal./100 gal. of spray solution
 - Package Sizes:
 - 2x2.5 gal. case
 - 250 gal. tote
 - Bulk
